Installation Instructions

**CAUTION** - Risk of Damage. Handle carefully.

1. **Do not** twist, bend, fold or crease Tivotape™.
2. **Do not** attempt to remove Tivotape™ once it has been installed.
   Attempting to pull Tivotape™ away from mounting surface after it has been adhered will cause damage to the product.
3. **Do not** use chemical solvents on Tivotape™ during routine maintenance.
4. **Failure to comply will damage the product and void the warranty.**

Option 1: Direct to Surface

**Note:** Use in clean, smooth, surface applications. Attaching to textured surfaces without the use of a mounting channel is not recommended.

**Step 1:** Unwind Tivotape™ from roll and cut to length according to project layout.

**Step 2:** Trim off excess length at cutoff zones only.

**Step 3:** Make sure surface where Tivotape™ is to be installed is smooth, clean, free of dirt, oil and debris.

**Note:** For backing tape to remain permanently attached, mounting surface must be clean and free of oil and debris.

**Caution:** Do not attempt to remove Tivotape™ once it has been adhered to surface. Stick down once to avoid damage to the product. If there is a misapplication, remove the Tivotape™, clean off all adhesive from the mounting surface and start over with a new strip of Tivotape™ on a clean surface.

**Make Connections Using Tivotape™ Connectors**

Use the included Connectors to connect Tivotape™ to power source and to interconnect segments of Tivotape™.

**Step 4:** Locate the Wire Lead and pull open the locking face, as shown.

**Step 5:** IMPORTANT! Use a small utility knife to scrape the eXoShield™ coating from each of the Pads and peel away the 3M VHB backing tape just from the end of the Tivotape™.

**WARNING!** Risk of product failure.

The eXoShield™ coating must be scraped away from the contact pads in order to create a solid electrical connection.

**Step 6:** Connect a Wire Lead to the Lead End of the run.

**Caution:** Orient the Connector so the small white Contact Plate at the opening of the Connector is facing up.

**Step 7:** Press the Locking Face all the way in to lock the Connector onto the Tivotape™.

**Step 8:** Continue to peel away the backing tape as the Tivotape™ is applied to a clean, smooth, surface area.

**Step 9:** Press firmly with hand along the entire length of Tivotape™ to ensure a strong bond to the mounting surface.

**Step 10:** Connect additional segments of Tivotape™ using supplied connectors. It is recommended that all connectors are attached to Tivotape™ before applying it to surface as described in Steps 5 through 8.

**Step 11:** Make electrical connections.
Installation Instructions (Continued)

Option 2: Mounting Channel
Mounting channels are recommended for most applications to create a smooth, flat adhesion surface and also to create different visual effects. Some styles of Channel may require a different Installation method than described below. Consult factory for details.

Step 1: Measure and cut mounting channel from supplied lengths to fit full length of mounting surface and drill countersunk mounting holes every 24” along channel.

Step 2: Attach mounting channel using No. 6 Flat Head screws (supplied by others) appropriate for mounting surface, ie: wood screws for wood.

Step 3: Make sure channel surface where Tivotape™ is to be installed is smooth, clean, free of all dirt, oil and debris. Note: Cleaning the channel mounting surface with alcohol is recommended.

Make Connections Using Tivotape™ Connectors
Use the included Connectors to connect Tivotape™ to power source and to interconnect segments of Tivotape™

Step 4: Locate the Wire Lead and pull open the locking face, as shown.

Step 5: IMPORTANT! Use a small utility knife to scrape the eXoShield™ coating from each of the Pads and peel away the 3M VHB backing tape just from the end of the Tivotape™.

WARNING! Risk of product failure. The eXoShield™ coating must be scraped away from the contact pads in order to create a solid electrical connection.

Step 6: Connect a Wire Lead to the Lead End of the run.

Caution: Orient the Connector so the small white Contact Plate at the opening of the Connector is facing up.

Step 7: Continue to peel away the backing tape as the Tivotape™ is applied to a clean, smooth channel surface.

Step 8: Install Lens and End Caps as required for application.

Step 9: Connect additional segments of Tivotape™ using supplied connectors. It is recommended that all connectors are attached to Tivotape™ before applying it to surface as described in Steps 5 through 7.

Step 10: Make electrical connections.

Note: Use the included connector options to run Tivotape™ around corners and to join multiple segments of Tivotape™ together.

Warning: Do not exceed the maximum linear run length per circuit. Max run lengths vary based on power supply. See page 3 for details.

Power Leads and Jumper Connectors
Compatible Channels

WRNR-CHAN-SLV-6.5*
Anodized Aluminum Extrusion, available in 6.5' lengths.

LOKM-CHAN-6.5*
Anodized Channel with flush lens, clips into TKUS channel (optional) available in 6.5' lengths.

DOME-CHAN-SLV-6.5*
Anodized Aluminum Extrusion, available in 6.5' lengths.

TPL-AL-CHAN-1A-8*
AL Series Aluminum Channel with Mounting Carrier Base. Available in 8 ft standard lengths.

EDGE-CHAN-WHT-6.5 (WHITE)*
EDGE-CHAN-SLV-6.5 (SLIVER)*
Aluminum Ceiling Edge Lit Channel with flush frosted lens (included), Finish options in white and silver, available in 6.5' lengths.

KOZL-CHAN-6.5*
Aluminum channel with flush lens, available in 6.5' length

* Lenses and End Caps available separately. Refer to Tivotape™ spec sheets for details.

Electrical Connections

Electrical Connections
Step 1: Turn power off before beginning electrical installation.
Note: Contacting hot wires against the Tivotape™ leads may damage the product and void the warranty.
Step 2: The Tivotape™ lead wires are marked for polarity. Connect to power source accordingly.
Step 3: Connect to a listed Class 2, 24V DC transformer only. See list of approved transformers.
Step 4: Tivotape may be dimmed using an MLV or ELV dimmer that is suitable for the power supply.

Product Specification Guide

<table>
<thead>
<tr>
<th>LIGHT SOURCE</th>
<th>MAX CONTINUOUS RUN LENGTH*</th>
