Please read instructions entirely before starting installation

Be sure power is turned off before installing or modifying the system

Call Tivoli, LLC tech support with questions

Caution: This Power Supply is designed to work on 100-277V AC line voltage only. Use of any other power source will cause damage, shorten the life of the fixture and will void the warranty.

Consult any and all applicable local and national codes for installation.

Do not conceal or extend exposed conductors through a building wall as per local electrical code.

Warning: With any luminaire or power supply for any application, basic safety precautions should always be followed to reduce the risk of fire, electric shock and personal injuries. This power supply should be installed by a certified professional.

Profile Dimensions

16" Box has knockouts On bottom only

Installation Instructions

Mounting Location Requirements
It is recommended that the enclosure be mounted with at least 10" of open space around it for proper ventilation. Do not mount next to or above heat radiating equipment. Operating under high ambient temperature may increase the internal temperature and will require a de-rating in output current. This power supply will operate efficiently between -40° C to +80° C with adequate ventilation. The enclosure is NEMA 1 rated for indoor applications.

Indoor Installation
Step 1: Locate Power Supply enclosure (NEMA 1 rated) in a suitable indoor location.

Step 2: Note the spacing of the mounting holes when determining mounting location.

Step 3: Knock out access holes as needed. 16" Boxes have knockouts only along the bottom of the box.

Step 4: Install strain reliefs (wire clamps) for ½" hole size. Input lead wires are 18AWG. Output lead wires are 14AWG.

Input Connection:
Bring external Positive (Black) and Negative (White) Power Lines through Strain Relief on the input side of the Transformer. Connect to Black and White Transformer Leads using the correct size and UL approved Wire Nuts.

Grounding: Connect the Green Ground Wire from inside the enclosure and the Green Transformer wire to incoming ground wire.
Luminaire Connections

Connection Options

There are three types of DMX In/Out ports:
1. RJ45
2. 3 Pin XLR
3. Screw connections

Programming 5 Channel DMX Sub-Controller

Programming the DMX Sub-Controller

Press “M” key to switch menus.
Press and hold “M” key to return to main menu.
Press “^” or “^” key to make selection.
Select “Exit” to return to previous Menu.

1. DMX Address Setting

| DMX | Mode: RGB | 8bit | Curve: Standard | Dim: Smo | TOOL&V
|-----|-----------|------|-----------------|---------|-----
| 001 | High      |      |                 |         |     

Press “^” or “^” key to set DMX address.
Range: 001~512

2. PWM Frequency

| DMX | Mode: RGB | 8bit | Curve: Standard | Dim: Smo | TOOL&V
|-----|-----------|------|-----------------|---------|-----
| 001 | High      |      |                 |         |     

Optional:
- Std (standard)
- High
- Mid (middle)
- Low

Press “^” or “^” key to choose.

3. Mode

| DMX | Mode: RGB | 8bit | Curve: Standard | Dim: Smo | TOOL&V
|-----|-----------|------|-----------------|---------|-----
| 001 | High      |      |                 |         |     

Press “^” or “^” key to choose.
Optional:
- Dim / CT
- RGB / RGBW / RGBWY

4. Grey Level

| DMX | Mode: RGB | 8bit | Curve: Standard | Dim: Smo | TOOL&V
|-----|-----------|------|-----------------|---------|-----
| 001 | High      |      |                 |         |     

Press “^” or “^” key to choose.
Optional:
- 8bit
- 16bit (choose it if the master controller support this function)

5. Dimming Curve

| DMX | Mode: RGB | 8bit | Curve: Standard | Dim: Smo | TOOL&V
|-----|-----------|------|-----------------|---------|-----
| 001 | High      |      |                 |         |     

Press “^” or “^” key to choose.
Optional:
- Standard
- Linear
- LOG

6. Enhance Dimming

| DMX | Mode: RGB | 8bit | Curve: Standard | Dim: Smo | TOOL&V
|-----|-----------|------|-----------------|---------|-----
| 001 | High      |      |                 |         |     

Press “^” or “^” key to choose.
Optional:
- Std (standard)
- Smo (smooth)
- High
- Mid (middle)
- Low

7. Tool

| DMX | Mode: RGB | 8bit | Curve: Standard | Dim: Smo | TOOL&V
|-----|-----------|------|-----------------|---------|-----
| 001 | High      |      |                 |         |     

Press “^” or “^” key to enter submenu.

* Fast self-testing function: press “^” or “^” keys simultaneously for 2-3 seconds under any page, decoder will enter self-testing function.
