Installation Instructions

**CAUTION - Risk of Damage. Handle carefully.**
1. **Do not** twist, bend, fold or crease Tivotape™.
2. **Do not** bend or crease lead wire at solder point.
3. **Do not** attempt to remove Tivotape™ once it has been installed. Attempting to pull Tivotape™ away from mounting surface after it has been adhered will cause damage to the product.
4. **Do not** use chemical solvents on Tivotape™ during routine maintenance.
   
   **Failure to comply will damage the product and void the warranty.**

**Option 1: Direct to Surface**

**Note:** Use in clean, smooth, surface applications. Attaching to textured surfaces without the use of a mounting channel is not recommended.

**Step 1:** Identify Tivotape™ from supplied lengths to fit the area as marked.

**Step 2:** Trim off excess length at cutoff zones only.

**Field cuttable section**

**Step 3:** Make sure surface where Tivotape™ is to be installed is smooth, clean, free of dirt, oil and debris.

**Note:** For backing tape to remain permanently attached, mounting surface must be clean and free of oil and debris.

**Step 4:** Peel off 3M VHB tape backing and apply Tivotape™ to clean, smooth, surface area.

**Step 5:** Press firmly with hand along the entire length of Tivotape™ to ensure a strong bond to the mounting surface.

**Caution:** Do not attempt to remove Tivotape™ once it has been adhered to surface. Stick down once to avoid damage to the product. If there is a misapplication, remove the Tivotape™, clean off all adhesive from the mounting surface and start over with a new strip of Tivotape™ on a clean surface.

**Step 6:** Make necessary electrical connections. (See Page 2)

**Caution:** Do not bend, twist or crimp the lead wire at the solder connection point. This will damage the product and void the warranty.
Installation Instructions (Continued)

Option 2: Mounting Channel
Mounting channels are recommended for most applications to create a smooth, flat adhesion surface and are also used for different effects.

Step 1: Measure and cut mounting channel from supplied lengths to fit full length of mounting surface and drill countersunk mounting holes every 24” along channel.

Step 2: Attach mounting channel using No. 6 Flat Head screws (supplied by others) appropriate for mounting surface, ie: wood screws for wood.

Step 3: Make sure channel where Tivotape™ is to be installed is smooth, clean, free of all dirt, oil and debris.

Note: Cleaning channel mounting surface with alcohol is recommended.

Step 4: Peel off VHB backing tape and apply Tivotape™ to clean mounting channel.

Step 5: Press firmly with hand along the entire length of Tivotape™ to ensure a strong bond to the Mounting Channel.

Step 6: Install Lens and End Caps as required for application.

Step 7: Make necessary electrical connections.

Examples of Available Channels:

MCHAN-8-LP
Clear Polycarbonate Mounting Channel

TPL-45-MCH-8-S
45° Wide Mounting Channel

INF-C-CHAN-8
Infinity Mounting Channel with lens for LED protection in tight spaces.

Electrical Connections

Step 1: Turn power off before beginning electrical installation.

Note: Contacting hot wires against the Tivotape™ leads may damage the product and void the warranty.

Step 2: The Tivotape™ lead wires are marked for polarity. Connect to power source accordingly.

Step 3: Connect to a listed Class 2, 24V DC transformer only. See list of approved transformers.

Step 4: Tivotape may be dimmed using an MLV or ELV dimmer that is suitable for the power supply.
