**ADAPT PENDANT**

ADAPT Pendant is a series of designer pendants, anchoring hardware, LED light engine and ADAPT glassware, which produce multiple mix and match options.

Based on the ADAPT light string series, Tivoli adds another element that can be designed into your interior space to connect your exterior element.

**PENDANT STYLE**

Multiple styles, shapes, materials and colors to choose from, allowing you to find the perfect fit for your design. Matching cord and drop anchor gives you the freedom to explore different hanging configurations to overcome difficult applications.

**ADAPT GLASS**

Our highly popular ADAPT glassware can be used as an indoor designer pendant. With 11 globe options to choose from, ADAPT becomes an exceptionally versatile system that can evolve to your specific taste. All globes are conformal coated with shatter resistant silicone to reduce or prevent fragmenting should the glass break.

**LIGHT ENGINE**

3 LED Light engines that produce 3 distinctly different effects are available. COB (Chip On Board), filament (T25), and pillar with frosted tip, give you another tool to complete the look you are trying to achieve. 3 standard color temperatures are available: 2700K, 4000K and 6500K.
**ADAPT Pendant - How it works**

(A) The unique placement of the drop anchor provides multiple configurations of the ADAPT Pendant to fit your application needs. Simply install the 4.75” canopy to its nearest respective J-Box.

(B) Mount the drop anchor to an opposite desired surface to align your pendant where illumination is needed.

(C) Vertical and/or horizontal adjustment of the 4’ anchor cord and drop retainer for a more precise location may be required (included).

**DIMENSIONS**

- Drop socket with 9.8’ textile cord
- 4’ Anchor cord
- Drop Retainer
- E26 Medium base fits all ADAPT light engines and glass globe options
